

Adaptor Board BB0008W1 of Control System SandRA Z200 line

The Adaptor Board **BB0008W1** of control system **SandRA Z200** is intended primarily for industry and conventional power industry. **SandRA** represents **robust and high-performance** system that is patterned on **our older and proven** lines supplemented with **innovations** from contemporary electrical engineering.

The Adaptor Board of the power supply serves to convey supply voltage to the power source input and further for conveying supply voltage to the **IO busbar** for which inputs/outputs of the **Z200 boards** are supplied.

- Board dimensions 80 x 233 mm
- Designed for 19" rack in the rear part of the chassis
- 2 terminal connectors WAGO
